STAT

Dear Jan and John:

Needless to say the enjoyable and somewhat amazing evening at your home was a rather unique experience. I'm still wrestling in my own mind the phenomenon involved and curiosity has prompted me to explore the various phenomenon of physics that caused all that I saw to happen, happen.

I was pleased with the opportunity to meet you as well as the other guests. I thank you for having me in your home and taking the time to walk us all through that interesting experience.

With best wishes and hopes that you won't run out of spoons.

Sincerely,

John N. McMahon
